holding of USD1,000 or its equivalent in the relevant share Class currency as appropriate. Z Classes require a minimum holding of USD20 million or its equivalent in the relevant share Class currency. Pacific Investment Management Company LLC ("PIMCO"), at sole discretion, is authorised to waive the minimum initial subscription, and minimum holding requirements as set forth in the current Prospectus.

# **Dealing Day:**

In relation to a Fund such day or days as shall be specified in the relevant Supplement for that Fund provided that in any event there will be one Dealing Day per fortnight. The Directors have delegated to PIMCO the authority to change the frequency of Dealing Days per Fund. Any change in the frequency of Dealing Days must receive the prior approval of the Depositary and will be notified to shareholders of the affected Fund(s) in advance.

Notwithstanding the foregoing, it will not be a Dealing Day for any Fund where either as a result of public holidays or market/stock exchange closures in any jurisdiction, it makes it difficult (i) to administer a Fund or (ii) value a portion of a Fund's assets. For further details on proposed Fund closures throughout the year, shareholders and prospective investors should contact the Administrator or consult the Funds Holiday Calendar (a copy of which is also available from the Administrator).

#### Dear Shareholder,

This annual report covers the 12-month reporting period ended 31 December 2023 (the "reporting period"). On the subsequent pages, you will find details regarding investment results and a discussion of certain factors that affected performance during the reporting period.

The global economy continued to grow despite inflation that remains elevated, interest rate increases, tighter credit conditions, and geopolitical concerns affecting many countries. This resilience was particularly evident in the United States ("U.S."). In contrast, some European economies recently experienced relatively flat growth.

#### **Central banks slowed interest rate hikes**

Inflation eased over the reporting period, and several bank officials suggested that central banks may slow aggressive interest-rate hikes. From March 2022 through July 2023, the U.S. Federal Reserve (the "Fed") raised the federal funds rate a total of 5.25 percentage points. In September, November and December 2023, the Fed did not increase interest rates. In December 2023, Fed communications conveyed a belief that the policy rate may be likely at or near its peak for the tightening cycle. From July 2022 through September 2023, the European Central Bank ("ECB") raised its deposit facility overnight rate a total of 4.50 percentage points and then held rates steady at its October and December 2023 meetings. Meanwhile, from December 2019 through July 2023, the Bank of England ("BoE") raised its Bank Rate a total of 5.15 percentage points and then held rates steady in September, November and December 2023. Both the ECB and BoE acknowledged the possibility of rate cuts in 2024.

#### **Mixed financial market returns**

The yield on the benchmark 10-year U.S. Treasury increased during the reporting period. In many other developed markets, yields on 10-year government bonds fluctuated. Overall, the global bond market rallied toward the end of 2023, bolstered by central bank officials' policy pronouncements signaling a possible end to monetary tightening. During the reporting period, lower-rated global bonds generally outperformed their higher-rated counterparts. Global equities rallied sharply, while commodities were mixed given economic uncertainties. The U.S. dollar strengthened against the Japanese yen, but fell relative to the euro and British pound.

We continue to work diligently to navigate dynamic global markets and manage the assets that you have entrusted with us. We encourage you to speak with your financial advisor about your goals and visit global.pimco.com for our latest insights.

Sincerely,

Craig A. Dawson Chairman

# **Important Information About the Funds**

This material is authorised for use only when preceded or accompanied by the current PIMCO Funds: Global Investors Series plc Prospectus. Investors should consider the investment objectives, risks, charges and expenses of these Funds carefully before investing. This and other information is contained in the Prospectus. Please read the Prospectus carefully before you invest or send money.

We believe that bond funds have an important role to play in a well diversified investment portfolio. It is important to note, however, that in an environment where interest rates may trend upward, rising rates will negatively impact the performance of most bond funds, and fixed income securities held by a Fund are likely to decrease in value. The price volatility of fixed income securities can also increase during periods of rising interest rates, resulting in increased losses to a Fund. Bond funds and individual bonds with a longer duration (a measure used to determine the sensitivity of a security's price to changes in interest rates) tend to be more sensitive to changes in interest rates, usually making them more volatile than securities or funds with shorter durations. The longer-term performance of most bond funds has benefited from capital gains in part resulting from an extended period of declining interest rates. In the event interest rates increase, these capital gains should not be expected to recur.

The Funds may be subject to various risks in addition to those described above, in the Funds' Prospectus and in the Financial Risks in the Notes to Financial Statements. Some of these risks may include, but are not limited to, the following: real rate risk, derivative risk, small company risk, foreign security risk, high-yield security risk, specific sector investment risks and epidemic/pandemic related risk. The Funds may use derivative instruments for hedging purposes or as part of an investment strategy. Use of these instruments may involve certain costs and risks such as liquidity risk, interest rate risk, market risk, credit risk, management risk and the risk that a Fund could not close out a position when it would be most advantageous to do so. Funds investing in derivatives could lose more than the principal amount invested in these instruments. Investing in foreign securities may entail risk due to foreign economic and political developments; this risk may be enhanced when investing in emerging markets. High-yield bonds typically have a lower credit rating than other bonds. Lower rated bonds generally involve a greater risk to principal than higher rated bonds. Smaller companies may be more volatile than larger companies and may entail more risk. Concentrating investments in individual sectors may add additional risk and volatility compared to a diversified fund.

Certain Funds may pursue an Environmental, Social and Governance (ESG) investing strategy, which typically selects or excludes securities of certain issuers for reasons other than financial performance. Such strategy carries the risk that a Fund's performance will differ from similar funds that do not utilise an ESG investing strategy. For example, the application of this strategy could affect a Fund's exposure to certain sectors or types of investments, which could negatively impact a Fund's performance. There is no guarantee that the factors utilised by the Investment Advisor will reflect the opinions of any particular investor, and the factors utilised by the Investment Advisor may differ from the factors that any particular investor considers relevant in evaluating an issuer's ESG practices. Future ESG development and regulation may impact a Fund's implementation of its investment strategy. In addition, there may be cost implications arising from ESG related due diligence, increased reporting and use of third-party ESG data providers.

Classifications of Fund portfolio holdings in this report are made according to financial reporting standards. The classification of a particular portfolio holding as shown in the Schedule of Investments and other sections of this report may differ from the classification used for the Fund's compliance calculations, including those used in the Fund's Prospectus, investment objectives, regulatory, and other investment limitations and policies, which may be based on different asset class, sector or geographical classifications. All Funds are separately monitored for compliance with respect to the Prospectus and regulatory requirements. Within the Schedule of Investments specific portfolio holdings may be aggregated where investments have the same attributes (i.e. coupon rates and maturity dates).

The geographical classifications of securities in this report are classified by the country of incorporation of a holding. In certain instances, a security's country of incorporation may be different from its country of economic exposure.

Certain securities and instruments in which a Fund may invest rely in some fashion upon the London Interbank Offered Rate ("LIBOR"). LIBOR is an average interest rate, determined by the ICE Benchmark Administration, that banks charge one another for the use of short-term money. In light of the phasing out of the use of LIBOR, relevant Funds will need to transition to another benchmark (e.g., the Secured Overnight Financing Rate, which is to replace U.S. Dollar LIBOR and measures the cost of overnight borrowings through repurchase agreement transactions collateralised with U.S. Treasury securities). Any potential effects of the transition away from LIBOR on a Fund or on certain securities and instruments in which a Fund invests can be difficult to ascertain, and they may vary depending on factors. The transition may also result in a reduction in the value of certain investments held by a Fund or a reduction in the effectiveness of related Fund transactions such as hedges. Any such effects of the transition away from LIBOR, as well as other unforeseen effects, could result in losses to a Fund.

On each individual Fund Summary page in this annual report, the net performance chart measures performance assuming that all dividend and capital gain distributions were reinvested. Returns do not reflect the deduction of taxes that a shareholder would pay on: (i) Fund distributions; or (ii) the redemption of Fund shares. The net performance chart measures each Fund's performance against the performance of a broad-based securities market index (benchmark index). Each Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. An investment in a Fund is not a deposit in a bank and is not guaranteed or insured by any government agency. The value of and income from shares in the Fund may go up or down and you may not get back the amount you have invested in the Funds.

#### Investment Objective and Strategy Overview

PIMCO Balanced Income and Growth Fund (formerly PIMCO Global Core Asset Allocation Fund) seeks to maximise total return, consistent with preservation of capital and prudent investment management, by taking exposure to a wide range of asset classes, including equities, fixed income, commodities and property (as described in the Fund Supplement). The Fund can also invest in other PIMCO Funds and other collective investment schemes (in accordance with the Prospectus).

#### **Fund Insights**

- » Long exposure to U.S. equities contributed to performance, as U.S. equities had positive returns during the period.
- » Long exposure to Japanese equities contributed to performance, as Japanese equities had positive returns during the period.
- » Long exposure to Taiwanese equities contributed to performance, as Taiwanese equities had positive returns during the period.
- » Long exposure to Chinese equities detracted from performance, as Chinese equities had negative returns during the period.
- » Long exposure to agency mortgage-backed securities ("MBS") detracted from performance, as the Fund's exposure was elevated in periods when spreads widened more than when spreads tightened.
- » Long exposure to the Japanese yen ("JPY") detracted from performance, as JPY depreciated against the U.S. dollar ("USD") during the period.

PIMCO Climate Bond Fund seeks optimal risk adjusted returns, consistent with prudent investment management, while giving consideration to long term climate related risks and opportunities. The Fund seeks to achieve its investment objective by investing under normal circumstances at least 80% of its total assets in a diversified portfolio of Fixed Income Instruments (as defined in the Prospectus), of varying maturities.

## **Fund Insights**

- » Spread tightening and positive carry in investment grade credit, particularly in financials and utilities, contributed to absolute performance.
- » Spread tightening and positive carry in high yield corporate credit, contributed to absolute performance.
- » Long exposure to hard currency emerging market debt, particularly in the utilities sector, contributed to absolute performance, as spreads on these securities tightened.
- » Long exposure to U.S. duration detracted from absolute performance as yields on the very front-end of the curve rose.
- » Long exposure to government-related bonds detracted from absolute performance, as spreads on these securities widened.

#### **Investment Objective and Strategy Overview**

Commodity Real Return Fund seeks to maximise total return consistent with prudent investment management by investing in derivative instruments (which may be listed or OTC), including swap agreements, futures, options on futures and structured notes and commodity index-linked notes, which enable it to gain exposures to any of the indices and sub-indices referencing commodities (including but not limited to any index within the Bloomberg Commodity family of indices) which meet with the requirements of and have; where necessary, been cleared by the Central Bank of Ireland. Details of any indices utilised by the Fund and the types of commodities they reference will be available from the Investment Advisor upon request. These instruments will provide exposure to the investment returns of the commodities markets without investing directly in physical commodities, and will be backed by an actively managed portfolio of global Fixed Income Instruments (as defined in the Prospectus). The Fund may also invest in common and preferred stocks as well as convertible securities of issuers in commodity-related industries.

- » Active commodity strategies, including exposure to California Carbon Allowances (CCAs) and an underweight to natural gas, contributed to relative performance as CCAs outperformed, while natural gas underperformed the broader Bloomberg Commodity Index.
- » Duration strategies in Europe, most notably exposure to Eurozone swap spreads as spreads tightened, contributed to relative performance.
- » Exposure to securitised credit, specifically collateralised debt obligations (CDOs), contributed to relative performance as CDO spreads tightened.
- » The structural allocation to global short-term Inflation-Linked Bonds (ILBs) as collateral backing the Fund's commodity exposure detracted from relative performance, as global short-term ILBs, as measured by the Bloomberg Barclays World Government Inflation-Linked Bond 1-5 Year Index (USD Hedged), underperformed the U.S. 3-Month Treasury Bill collateral within the commodity index.
- » Underweight exposure to Japanese sovereign interest rates in the first half of the period detracted from relative performance, as the financing cost of the position detracted.
- » An overweight to Italian breakeven inflation detracted from relative performance, as Italian breakevens fell.

#### Investment Objective and Strategy Overview

**Emerging Markets Short-Term Local Currency** Fund seeks maximum total return, consistent with preservation of capital and prudent investment management, by investing at least 80% of its assets in currencies of, or in Fixed Income Instruments (as defined in the Prospectus) denominated in currencies of, emerging markets. The Investment Advisor has a broad discretion to identify countries that it considers to qualify as emerging markets. The Investment Advisor will select the Fund's country and currency composition based on its evaluation of relative interest rates, inflation rates, exchange rates, monetary and fiscal policies, trade and current account balances, and other specific factors the Investment Advisor believes to be relevant. The Fund is likely to concentrate its investments in Asia, Africa, the Middle East, Latin America and the emerging countries of Europe. The Fund may invest in instruments whose return is based on the return of an emerging market security such as a derivative instrument, rather than investing directly in emerging market securities. The average portfolio duration of this Fund varies based on the Investment Advisor's forecast for interest rates and, under normal market conditions, is not expected to exceed two years. The Fund may invest all of its assets in high yield securities, subject to a maximum of 15% of its assets in securities rated lower than B by Moody's or S&P or equivalently rated by Fitch (or, if unrated, determined by the Investment Advisor to be of comparable quality).

Euro Bond Fund seeks to maximise total return, consistent with preservation of capital and prudent investment management. The Fund seeks to achieve its investment objective by investing at least two-thirds of its assets in a diversified portfolio of Euro-denominated Fixed Income Instruments (as defined in the Prospectus) of varying maturities. The Fund promotes environmental and social characteristics but does not have sustainable investment as its objective.

#### **Fund Insights**

- » Curve positioning in the Euro Bloc, namely overweight in the belly of the curve, contributed to relative performance, as interest rates fell.
- » Long exposure to securitised credit, mainly via U.K. and European residential mortgage backed securities and European collateralised loan obligations, contributed to relative performance, as spreads tightened.
- » Duration positioning in U.S. rates, including long exposure at the end of the year, contributed to relative performance, as yields fell during November and December.
- » Security selection within bank capital detracted from performance, as exposure to subordinated debt, in particular from a select Swiss bank, underperformed.
- » Short exposure to Japanese duration earlier in the year detracted from relative performance, as yields fell.

#### **Fund Insights**

- » Curve positioning in the Euro bloc, particularly an overweight to the intermediate section of the curve, contributed to relative performance as yields fell during the third and fourth quarters.
- » Instrument selection in the Euro bloc, namely a preference for interest rate swaps as swap spreads tightened, contributed to relative performance.
- » Security selection within senior financials contributed to relative performance.
- » Underweight exposure to duration in China detracted from relative performance as yields fell.
- » Long exposure to the Japanese yen detracted from relative performance as the currency depreciated against the U.S. dollar.
- » Underweight exposure to non-financial investment grade credit detracted from relative performance as spreads tightened.

#### **Investment Objective and Strategy Overview**

Global Investment Grade Credit ESG Fund seeks to maximise total return, consistent with preservation of capital, prudent investment management and sustainable investing (by explicitly integrating environmental, social and governance factors into the investment process as further outlined in the Supplement). The Fund seeks to achieve its investment objective by investing at least two-thirds of its assets in a diversified portfolio of investment grade corporate Fixed Income Instruments (as defined in the Prospectus).

- » Macro strategies contributed to performance due to duration positioning in developed markets.
- » Security selection within emerging markets external debt, as overweight exposure to select ESG bonds contributed to performance.
- » An underweight to the government-related sector and in particular to supranationals contributed to performance, as the sector underperformed the broader market on an excess return basis during the year.
- » Foreign currencies positioning in developed markets, and in particular a modest long exposure to the Japanese yen, detracted from performance.
- » Security selection within the banking sector detracted from performance amid the broader volatility in the sector earlier in the year.

Global Low Duration Real Return Fund seeks to maximise real return, consistent with preservation of real capital and prudent investment management, by investing at least 70% of its assets in a diversified portfolio of inflation-indexed Fixed Income Instruments (as defined in the Prospectus) of varying maturities issued by governments, their agencies or instrumentalities and corporations. Inflation-indexed bonds are Fixed Income Instruments that are structured to provide protection against inflation. The Fund promotes environmental and social characteristics but does not have sustainable investment as its objective.

#### **Fund Insights**

- » Exposure to U.S. agency mortgage-backed securities (MBS) contributed to relative performance, as U.S. agency MBS spreads tightened.
- » Duration strategies in Europe, including short exposure over the first three quarters as yields rose and exposure to Eurozone swap spreads in the second half of the period as spreads tightened, contributed to relative performance.
- » Increasing the overweight to U.S. interest rates near the cycle's peak contributed to relative performance as U.S. interest rates declined significantly in the last quarter of the year.
- » Underweight exposure to German nominal sovereign interest rates detracted from relative performance, as German nominal yields declined.
- » Underweight exposure to Japanese sovereign interest rates in the first half of the period detracted from relative performance, as the expectation for a rise in these rates did not materialize as quickly while the financing cost of the position detracted.
- » Overweight exposure to the Japanese yen (JPY), especially in the beginning of the period and an underweight to the Canadian dollar (CAD), especially in the end of the period, funded by an underweight in the US dollar (USD) detracted from relative performance as JPY depreciated, while CAD appreciated against the USD.

Global Real Return Fund seeks to maximise real return, consistent with preservation of real capital and prudent investment management. The Fund seeks to achieve its investment objective by investing at least two-thirds of its assets in a diversified portfolio of inflationindexed Fixed Income Instruments (as defined in the Prospectus) of varying maturities issued by governments, their agencies, or instrumentalities and corporations. The Fund promotes environmental and social characteristics but does not have sustainable investment as its objective.

#### **Fund Insights**

- » Duration strategies in Europe, including short exposure over the first three quarters as yields rose and exposure to Eurozone swap spreads in the second half of the period as spreads tightened, contributed to relative performance.
- » Exposure to U.S. agency mortgage-backed securities (MBS) contributed to relative performance, as U.S. agency MBS spreads tightened.
- » Increased exposure to U.S. interest rates near the cycle's peak contributed to relative performance, as subsequently U.S. interest rates declined significantly in the last quarter of the year.
- » Overweight Japanese breakeven inflation as Japanese breakeven inflation rose, and curve positioning in U.K. breakeven inflation, contributed to relative performance.
- » Underweight exposure to German nominal sovereign interest rates detracted from relative performance, as German nominal yields declined.
- » Underweight exposure to Japanese sovereign interest rates in the first half of the period detracted from relative performance, as the expectation for a rise in these rates did not materialise as quickly while the financing cost of the position detracted.
- » Overweight exposure to the Japanese yen (JPY), especially in the beginning of the period and an underweight to the Canadian dollar (CAD), especially in the end of the period, funded by an underweight in the U.S. dollar (USD) detracted from relative performance as JPY depreciated, while CAD appreciated against the USD.

Inflation Multi-Asset Fund seeks to preserve the real value of capital through prudent investment management. The Fund will be managed actively and will predominantly invest in a diversified portfolio of inflation-related assets. The Fund seeks to achieve its objective by investing in a combination of global inflation-related Fixed Income Instruments (as defined in the Prospectus), emerging market bonds and currencies, equities and equity-related securities, and commodity and property-related instruments. Exposure to such assets may be achieved through direct investment or through the use of financial derivative instruments as detailed in the Prospectus. The Fund will pursue a multi-assetoriented investment strategy in accordance with its investment policies. The objective of the strategy is to achieve real capital preservation over time by allocating to a range of inflationrelated asset classes. As part of its investment strategy, the Investment Advisor will use a global secular forecast of interest and inflation rates across economies and an integrated investment process as set out in the Prospectus.

### **Fund Insights**

- » Active commodity strategies, including exposure to California Carbon Allowances (CCAs) and underweight exposure to natural gas, contributed to relative performance as CCAs outperformed, while natural gas underperformed the broader Bloomberg Commodity Index.
- » Duration strategies in Europe, including short exposure over the first three quarters and exposure to Eurozone swap spreads contributed to relative performance as yields rose and spreads tightened.
- » Exposure to U.S. agency mortgage-backed securities (MBS) contributed to relative performance, as U.S. agency MBS spreads tightened.
- » Overweight Japanese breakeven inflation contributed to relative performance, as Japanese breakeven inflation rose.
- » Tactical underweight allocation to gold detracted from relative performance, as gold prices rose over the period.
- » Underweight exposure to Japanese sovereign interest rates in the first half of the period detracted from relative performance, as the expectation for a rise in these rates did not materialise as quickly while the financing cost of the position detracted.
- » Overweight exposure to the Japanese yen (JPY), especially in the first half of the period and an underweight to the Canadian dollar (CAD), especially at the end of the period, funded by an underweight in the U.S. dollar (USD) detracted from relative performance as JPY depreciated, while CAD appreciated against the USD.
- » Security selection within developed market real estate equities detracted from relative performance.

### **Investment Objective and Strategy Overview**

PIMCO MLP & Energy Infrastructure Fund seeks to maximise total return, consistent with prudent investment management. The "total return" sought by the Fund consists of income and capital appreciation. The Fund seeks to achieve its investment objective by investing under normal circumstances at least two-thirds of its net assets either directly or indirectly in a portfolio of equity investments which are linked to (i) publicly traded partnerships, which are also known as master limited partnerships ("MLPs"), (ii) the general partners that own or manage MLPs, (iii) spin-offs (companies which separate from the MLPs or general partner after divestitures or restructuring) from MLPs, (iv) companies that are similar to MLPs by virtue of operating in the same industry or competing with MLPs (v) other entities that may not be structured as a publicly traded partnership but operate in the mid-stream energy sector (the transportation component of the energy infrastructure sector such as pipeline, rail and oil tankers) and (vi) special purpose entities (i.e., entities established for a specific purpose which may be used as an investment vehicle to gain access to investments outlined herein). The Fund may invest in these instruments either in the secondary market or during an initial public offering.

## **Fund Insights**

- » Exposure to midstream energy equities contributed to absolute returns as the sector generated positive returns.
- » Security selection in the gathering and processing sub-sector contributed to relative returns, as the Fund's holdings within this sector outperformed.
- » Security selection within liquefaction companies contributed to relative returns, as the Fund's holdings in the sector outperformed.
- » Underweight to marketing and distribution companies detracted from relative returns, as the sector generated positive returns.
- » Security selection in the pipeline transportation of petroleum sub-sector sector detracted from relative returns, as the Fund's holdings in the sector underperformed.
- » Security selection in the pipeline transportation of natural gas sub-sector sector detracted from relative returns, as the Fund's holdings within this sector underperformed.

## Fund Insights

- » Positioning across a wide range of global rates markets generated losses from several sharp reversals throughout the year. Notable detractors included short positions in Chilean, South African, and long positions in Hungarian rates.
- » Short positioning in Thailand baht, New Zealand dollar, and Indian rupee against the U.S. dollar detracted due to price reversals.
- » Positioning in Asian Pacific equities generated losses from several sharp reversals throughout the year. Notable detractors included positions in Singapore, China, and Korean Indices.
- » Long positions in Mexican peso, Colombian peso, each of which appreciated relative to the U.S. dollar, and short positions in Chinese renminbi, which weakened relative to the U.S. dollar contributed to performance.
- » Short positions in natural gas contributed to performance as energy prices decreased.
- » Short positions in U.S. and European equity implied volatility contributed to performance due to sustained low volatility.

US Short-Term Fund seeks maximum current income consistent with the preservation of capital and daily liquidity. The Fund invests at least two-thirds of its total assets in a diversified portfolio of Fixed Income Instruments (as defined in the Prospectus) of varying maturities issued by various U.S. and non-U.S. public- or privatesector entities. The average portfolio duration of this Fund will normally vary based on the Investment Advisor's forecast for interest rates and is not expected to exceed one year. The Fund will reference its performance against a benchmark rate of the FTSE 3-Month U.S. Treasury Bill Index. The FTSE 3-Month U.S. Treasury Bill Index is an unmanaged index representing monthly return equivalents of yield averages of the last 3-month Treasury Bill issues.

- » Underweight U.S. duration, as the inverted U.S. yield curve provided a carry advantage versus the benchmark as short term U.S. rates rose.
- » Holdings of investment grade corporate credit, specifically financials, contributed to relative performance as spreads tightened.
- » Overweight exposure to collateralised loan obligations contributed to relative performance, as spreads tightened.
- » Overweight exposure to agency mortgagebacked securities detracted from relative performance (mainly from Q1 and Q2), as spreads widened during that period.
- » There were no other material detractors for this Fund.

#### **Index Description**

1 Month NIBOR (Norwegian Interbank Offered Rate) Index is an average interest rate, determined by Norges Bank, that is derived from the rate on a similar loan in the U.S. dollar market plus the interest rate differential between Norwegian Kroner and U.S. dollars from the forward exchange market. It is not possible to invest directly in an unmanaged index.

The Bloomberg Global Aggregate Credit ex-Emerging Markets Index provides a broad-based measure of the global developed investment-grade fixed income markets. The ICE BofA BB-B Rated Developed Markets High Yield Constrained ESG Tilt Index tracks the performance of below investment grade bonds of corporate issuers domiciled in developed market countries rated BB1 through B3, based on an average of Moody's, S&P and Fitch and adjusts security weightings so as to improve the overall Environmental, Social, Governance ("ESG") risk score of the index. The JPMorgan ESG Emerging Markets Bond Index Global Diversified tracks total returns for U.S. dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities, and incorporating environmental, social, and governance factors in the index construction.

The Bloomberg Global Aggregate Credit ex Emerging Markets (USD Hedged) provides a broad-based measure of the global developed markets investment-grade fixed income markets. ICE BofA BB-B Rated Developed Markets High Yield Constrained Index (USD Hedged) tracks the performance of below investment grade bonds of corporate issuers domiciled in developed market countries having an investment grade foreign currency long term debt rating (based on a composite of Moody's, S&P, and Fitch). The Index includes bonds denominated in U.S. dollars, Canadian dollars, sterling, euro (or euro legacy currency), but excludes all multicurrency denominated bonds. Bonds must be rated below investment grade but at least B3 based on a composite of Moody's, S&P, and Fitch. Qualifying bonds are capitalisation-weighted provided the total allocation to an individual issuer (defined by Bloomberg tickers) does not exceed 2%. Issuers that exceed the limit are reduced to 2% and the face value of each of their bonds is adjusted on a pro-rata basis. Similarly, the face value of bonds of all other issuers that fall below the 2% cap are increased on a pro-rata basis. Prior to September 25th, 2009, the ICE BofA Merrill Lynch Indices were known as the Merrill Lynch Indices. The JPMorgan EMBI Global (USD Hedged) tracks total returns for U.S. dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities, Brady bonds, loans, Eurobonds and local market instruments. It is not possible to invest directly in an unmanaged index.

3 Month HIBOR (Hong Kong Interbank Offered Rate) Index is a reference rate that shows an average of the interest rates at which a number of banks designated by the Hong Kong Association of Banks are willing to lend to one another without collateral at different maturities.

The Bloomberg Global Inflation Linked 1-30yrs Index measures the performance of the major developed market government inflation-linked bond markets. It is market capitalisation-weighted and includes maturities up to 30 years. JPMorgan Emerging Local Markets Index Plus tracks total returns for local currency-denominated money market instruments in 24 emerging markets countries. The Bloomberg Commodity Total Return Index reflects the return on fully collateralised positions in the underlying commodity futures of a number of physical commodities. The index is designed to be a highly liquid and diversified benchmark for commodities as an asset class. The FTSE NAREIT Global Real Estate Developed Total Return Index is a free-float adjusted, market capitalisation-weighted index designed to track the performance of listed real estate companies worldwide. The Bloomberg Gold Subindex Total Return Index reflects the return on fully collateralised positions in the underlying commodity futures. It is not possible to invest in an unmanaged index.

The benchmark is a blend of 50% JPMorgan EMBI Global Index/50% JPMorgan Government Bond Index-Emerging Markets Global Diversified Index (USD Unhedged), JPMorgan EMBI Global Index tracks total returns for U.S. dollar-denominated debt instruments issued by emerging market sovereign and guasi-sovereign entities: Brady bonds, loans, and Eurobonds JPMorgan Government Bond Index-Emerging Markets Global Diversified Index (USD Unhedged) is a comprehensive global local emerging markets index, and consists of regularly traded, liquid fixed-rate, domestic currency government bonds to which international investors can gain exposure. It is not possible to invest directly in an unmanaged index.

The benchmark is a blend of 60% MSCI All Country World Index (ACWI) and 40% Bloomberg U.S. Aggregate Bond (USD Hedged) Index. The MSCI All Country World Index is a free float-adjusted market capitalisationweighted index that is designed to measure the equity market performance of developed and emerging markets. The Index consists of 47 country indices comprising 23 developed and 23 emerging market country indices. Bloomberg U.S. Aggregate Bond (USD Hedged) Index provides a broad-based measure of the global investmentgrade fixed income markets. The three major components of this index are the U.S. Aggregate, the Pan-European Aggregate, and the Asian-Pacific Aggregate Indices. The index also includes Eurodollar and Euro-Yen corporate bonds, Canadian Government securities, and USD investment grade 144A securities. It is not possible to invest directly in an unmanaged index.

#### **Legal Benchmark Name**

#### **Index Description**

75% Bloomberg U.S. Aggregate Bond Index/25% MSCI ACWI High Dividend **Yield Index** 

Bloomberg U.S. Aggregate (EUR Hedged) Index represents securities that are SEC-registered, taxable, and U.S. dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis. It is not possible to invest directly in an unmanaged index. The MSCI ACWI High Dividend Yield Index is based on MSCI ACWI (EUR Hedged), its parent index, and includes large and mid cap stocks across 23 developed markets (DM) and 24 emerging markets (EM) countries. The index is designed to reflect the performance of equities in the parent index (excluding REITs) with higher dividend income and quality characteristics than average dividend yields that are both sustainable and persistent. The index also applies quality screens and reviews 12-month past performance to omit stocks with potentially deteriorating fundamentals that could force them to cut or reduce dividends.

#### **Index Description**

**ICE BofA BB-B European Currency High Yield Constrained Index** 

The ICE BofA BB-B European Currency High Yield Constrained Index is designed to track the performance of Euro and British pound sterling-denominated below investment grade corporate debt publicly issued in the eurobond, sterling domestic or euro domestic markets. To be eligible for Index inclusion bonds must be rated below investment grade but at least B3 based on an average of Moody's, S&P, and Fitch. Individual issuer exposure within the Index is capped at 3%.

ICE BofA BB-B Rated Developed **Markets High Yield Constrained Index Hedged into USD** 

ICE BofA BB-B Rated Developed Markets High Yield Constrained Index Hedged into USD tracks the performance of below investment grade bonds of corporate issuers domiciled in developed market countries having an investment grade foreign currency long term debt rating (based on a composite of Moody's, S&P, and Fitch). The Index includes bonds denominated in U.S. dollars, Canadian dollar, British pound sterling, Euro (or Euro legacy currency), but excludes all multicurrency denominated bonds. Bonds must be rated below investment grade but at least B3 based on a composite of Moody's, S&P, and Fitch. Qualifying bonds are capitalisation-weighted provided the total allocation to an individual issuer (defined by Bloomberg tickers) does not exceed 2%. Issuers that exceed the limit are reduced to 2% and the face value of each of their bonds is adjusted on a pro-rata basis. Similarly, the face value of bonds of all other issuers that fall below the 2% cap are increased on a pro-rata basis. Prior to 25 September 2009, the ICE BofA Merrill Lynch Indices were known as the Merrill Lynch Indices.

ICE BofA Sterling Non-Gilts 10+ Index

The ICE BofA Sterling Non-Gilts 10+ Index is made up of investment grade Sterling-denominated bonds, excluding Sterling-denominated bonds issued by the British government. Index provides a benchmark for investment opportunities in U.S. dollar-denominated fixed income instruments issued by Asia ex-Japan sovereigns, guasi-sovereigns, and corporates.

JPMorgan Asia Credit Index Non-Investment Grade comprises fixed rate U.S. dollar-denominated high yield bonds issued by Asia sovereigns, quasi-sovereigns, banks and corporates. The existing JPMorgan Asia Credit Index Non-Investment Grade contains both fixed and floating rate bonds issued by Asia-domiciled entities having a nominal outstanding of at least US\$150 million and more than one year to maturity.

The PIMCO Global Advantage Bond Index (GLADI) (London Close) is a diversified global index that covers a wide spectrum of global fixed income opportunities and sectors, from developed to emerging markets, nominal to real asset, and cash to derivative instruments. Unlike traditional indices, which are frequently comprised of bonds weighted according to their market capitalisation, GLADI uses GDP-weighting which puts an emphasis on faster-growing areas of the world and thus makes the index forward-looking in nature. PIMCO's GLADI methodology is intellectual property covered by U.S. Patent No. 8,306,892. GLOBAL ADVANTAGE and GLADI are trademarks of Pacific Investment Management Company LLC.

S&P 500 Index is an unmanaged market index generally considered representative of the stock market as a whole. The Index focuses on the large-cap segment of the U.S. equities market. It is not possible to invest directly in an unmanaged index.

This index stores the Shekel Overnight Interest Rate and is equal to the Bank of Israel rate, except on days when the SHIR is not published, it's value will be what it was on the last day it was published. The Bank of Israel Rate is determined by the Bank of Israel Monetary Committee eight times a year, generally on Mondays at 16:00. The dates of the Bank of Israel interest rate's publication and application are published each year on the Bank of Israel's website. The SHIR will be published on the Bank of Israel website by 11:00 each day, except for Saturdays, Sundays, and additional dates as published on the Bank of Israel website each year, and that will be updated periodically. It is not possible to invest directly in an unmanaged index.

The Singapore Overnight Rate Average (SORA) is the volume-weighted average rate of borrowing transactions in the unsecured overnight interbank Singapore dollar cash market in Singapore.

- (1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (3) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (4) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

(1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

<sup>(2)</sup> The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

<sup>(3)</sup> This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

<sup>(1)</sup> If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

<sup>(2)</sup> The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

- (1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (3) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.
